

Positions: Multiple Site Leads for Critical Care Decontamination System (CCDS)

Locations: NY, Washington D.C., Boston, Columbus, OH, Tacoma, WA and various other locations TBD

SE2S is seeking experienced **Site Leads** to manage CCDS teams at various locations throughout the United States. Site Leads responsibilities include managing 2, 12 hour work shifts, track/solve issues, daily report to the coordination center, track personnel, interact with customers on site, manage logistical support for the team: hotel, transportation, rotation to meals, track and order necessary supplies, report to Coordination Center on daily report, problem solve, ensure production continues 24/7, manage waste, ensure team is following Standard Operating Procedures (SOPs), ensure team and site safety, manage and report time worked. The CCDS System can decontaminate tens of thousands of N95 masks per day using concentrated, vapor-phase hydrogen peroxide. Inside a specially outfitted steel storage container, N95 masks are exposed to the validated concentration level to kill biological contaminants, including SARS-CoV-2. The system can decontaminate the same N95 mask up to 20 times without degrading the N95 mask's filtration performance.

Site Leads are required to attend a 3-day training course at the West Jefferson Lab in Columbus, OH and then be available for 60 days for deployment to sites OCONUS. Work is anticipated to last a minimum of 120 days with the likelihood of assignments lasting 160-180 days. This is a 1099 position that includes Travel, and PerDiem per the JFTR. PPE (masks and garments) will be provided to all team members.

CCDS Site Lead Personnel:

- BS and 4 yrs training experience or 8 years training experience
- Available to be at West Jefferson lab within 10 days of signing consulting agreement
- Available for a minimum of 60 days afterward

SE2S offers a highly competitive package of pay and travel. Applicants selected will be subject to a government security investigation and must meet eligibility requirements for access to classified information.
